A) Look at the two pie charts below, then find the ten errors in the paragraph describing the charts.

# Family A's Monthly Expenses 

Misc 2\%

Food 19\% Bills 14\%

## Family B's Monthly Expenses

Both families biggest expenditure each month is the mortgage. Family A spends far more on their mortgage than they do on anything else (32\%). This is exactly half what they spend on entertainment each month. Their food budget (19\%) is significantly higher than their entertainment budget, while they spend well under $10 \%$ each month on clothes. Family B's clothes budget is similar to A's, at just 9\%. In contrast, Family B spends much more on bills each month, over a quarter of the whole monthly budget. This is compensated for by their mortgage, which is slight less than Family A's, at only $24 \%$. Just over $15 \%$ of their monthly budget goes on the car, significantly more than the $9 \%$ that Family A spends each month. In general, Family B spends much more on necessary items such as bills, food and their car, while Family A allows slightly more money for entertainment and clothes.
